

# 640-816: Interconnecting Cisco Networking Devices Part 2 v1.1

## **Course Introduction**

4m

Course Introduction

## **Chapter 01 - Small Network Implementation**

24m

### **Introducing the Review Lab**

Cisco IOS User Interface Functions  
Overview of Cisco IOS Configuration Modes  
Cisco IOS CLI Hierarchy  
Help Facilities of the Cisco IOS CLI  
Command Review Discussion  
Access to the Remote Labs  
Summary  
Chapter 01 Review

## **Chapter 02 - Medium-Sized Switched Network Construction**

3h 52m

### **Implementing VLANs and Trunks**

Issues in a Poorly Designed Network  
VLAN Overview  
Designing VLANs for an Organization  
Guidelines for Applying IP Address Space  
Network Traffic Types  
Voice VLAN Essentials  
Advantages of Voice VLANs  
VLAN Operation  
VLAN Membership Modes  
802.1Q Trunking  
802.1Q Frame  
Understanding Native VLANs  
VTP Features  
VTP Modes  
VTP Operation  
VTP Pruning  
Configuring VLANs and Trunks  
VTP Configuration Guidelines  
Configuring VTP Server and Client  
VTP Configuration and Verification Example  
802.1Q Trunking Considerations  
Configuring 802.1Q Trunking  
Verifying a Trunk  
VLAN Creation Guidelines  
Adding a VLAN  
Verifying a VLAN  
Assigning Switch Ports to a VLAN  
Verifying VLAN Membership  
Demo - VLAN  
Executing Adds, Moves, and Changes for VLANs  
Summary  
**Optimizing Spanning Tree Performance**  
Interconnection Technologies  
Advantages of EtherChannel

Demo - Bridging  
Redundant Topology  
Broadcast Frames  
Broadcast Storms  
Multiple Frame Copies  
MAC Database Instability  
Demo - STP  
Loop Resolution with STP  
Spanning-Tree Operation  
STP Root Bridge Selection  
Spanning-Tree Port Transition  
Demo - BPDU  
Default Spanning-Tree Configuration  
Describing PortFast  
Configuring PortFast  
Verifying PortFast  
Per VLAN Spanning Tree Plus  
PVST+ Extended Bridge ID  
Spanning-Tree Operation Example  
Spanning-Tree Path Cost  
Spanning-Tree Recalculation  
Demo - SwitchConfig  
Rapid Spanning Tree Protocol  
PVRST+ Configuration Guidelines  
PVRST+ Commands  
Verifying PVRST+  
Configuring the Root and Secondary Bridges  
Verifying the Root and Secondary Bridges: SwitchB  
Summary  
**Routing Between VLANs**  
VLAN-to-VLAN Overview  
Inter-VLAN Routing  
Dividing a Physical Interface into Subinterfaces  
Routing Between VLANs with 802.1Q Trunks  
Verifying Inter-VLAN Routing  
Summary  
**Securing the Expanded Network**  
Overview of Switch Security  
Recommended Practices: New Switch Equipment  
Recommended Practices: Switch Security  
Port Security  
802.1X Port-Based Authentication  
Summary  
**Troubleshooting Switched Networks**  
Troubleshooting Switches  
Troubleshooting Port Connectivity  
Troubleshooting VLANs and Trunks  
Troubleshooting VTP  
Troubleshooting Spanning Tree  
Summary  
Chapter 02 Review

## **Chapter 03 - Medium-Sized Routed Network Construction**

2h 19m

### **Reviewing Routing Operations**

Static vs. Dynamic Routes  
Demo - Static Route  
Dynamic Routing Protocol  
Purpose of a Dynamic Routing Protocol  
Autonomous Systems: Interior and Exterior Routing Protocols  
Classes of Routing Protocols  
Selecting the Best Route Using Metrics  
Administrative Distance: Ranking Routes  
Distance Vector Routing Protocols  
Sources of Information and Discovering Routes  
Maintaining Routing Information  
Demo - RIP Review  
Inconsistent Routing Entries: Counting to Infinity and Routing Loops  
Counting to Infinity  
Solution to Counting to Infinity: Define a Maximum  
Routing Loops  
Solution to Routing Loops: Split Horizon  
Solution to Routing Loops: Route Poisoning and Poison Reverse  
Solution to Routing Loops: Hold-Down Timers  
Triggered Updates  
Eliminating Routing Loops  
Link-State Routing Protocols  
Link-State Routing Protocols Process  
Hierarchical Routing  
Link-State Routing Protocol Algorithms  
Link-State Routing Benefits  
Link-State Routing Drawbacks  
Summary

### **Implementing VLSM**

Subnetting Review  
Subnetting Review Exercise  
Variable-Length Subnet Mask  
Working VLSM Example  
Understanding Route Summarization  
Classful Routing Essentials  
Classless Routing Essentials  
Summarizing Within an Octet  
Summarizing Addresses in a VLSM-Designed Network  
Route Summarization Operation in Cisco Routers  
Demo - VLSM  
Summarizing Routes in a Discontiguous Network  
Summary  
Chapter 03 Review

## **Chapter 04 - Single-Area OSPF Implementation**

1h 20m

### **Implementing OSPF**

OSPF Essentials  
OSPF Hierarchy Example  
Neighbor Adjacencies: Hello Protocol  
SPF Algorithm  
Configuring Single-Area OSPF  
OSPF Router ID  
Configuring Loopback Interfaces

Verifying the OSPF Configuration  
OSPF debug Commands  
Demo - OSPF  
Load Balancing with OSPF  
OSPF Authentication  
Configuring OSPF Plaintext Password Authentication  
Plaintext Password Authentication Configuration Example  
Verifying Plaintext Password Authentication  
Summary  
**Troubleshooting OSPF**  
Components of Troubleshooting OSPF  
Troubleshooting OSPF Neighbor Adjacencies  
Troubleshooting OSPF Routing Tables  
Troubleshooting OSPF Authentication  
Summary  
Chapter 04 Review

## **Chapter 05 - EIGRP Implementation**

1h 12m

### **Implementing EIGRP**

EIGRP Features  
EIGRP Tables  
EIGRP Path Calculation (Router C)  
EIGRP Configuration  
Verifying the EIGRP Configuration  
EIGRP and Discontiguous Networks Default Scenario Configuration  
EIGRP and Discontiguous Networks with no auto-summary  
EIGRP and Discontiguous Networks Default Scenario Configuration (Cont.)  
Verifying the EIGRP Configuration (Cont.)  
debug ip eigrp Command  
EIGRP Metric  
Examining the Metric Values  
EIGRP Load Balancing  
EIGRP Unequal-Cost Load Balancing  
Variance Example  
Demo - EIGRP  
EIGRP MD5 Authentication  
EIGRP MD5 Authentication Configuration Steps  
EIGRP MD5 Authentication Configuration Example  
Verifying MD5 Authentication  
Troubleshooting EIGRP Authentication  
Troubleshooting EIGRP Authentication Problem  
Summary  
**Troubleshooting EIGRP**  
Components of Troubleshooting EIGRP  
Troubleshooting EIGRP Neighbor Issues  
Troubleshooting EIGRP Routing Tables  
Summary  
Chapter 05 Review

## **Chapter 06 - Access Control Lists**

1h 48m

### **Introducing ACL Operation**

Why Use ACLs?  
ACL Applications: Filtering  
ACL Applications: Classification  
Outbound ACL Operation  
List of Tests: Deny or Permit

Types of ACLs  
Identifying ACLs  
IP Access List Entry Sequence Numbering  
ACL Configuration Guidelines  
Dynamic ACLs (Lock and Key)  
Reflexive ACLs  
Time-Based ACLs  
Wildcard Bits: How to Check the Corresponding Address Bits  
Wildcard Bits to Match IP Subnets  
Wildcard Bit Mask Abbreviations  
Summary  
**Configuring and Troubleshooting ACLs**  
Testing Packets with Numbered Standard IPv4 ACLs  
Numbered Standard IPv4 ACL Configuration  
Applying Standard IPv4 ACLs to Interfaces  
Numbered Standard IPv4 ACL: Example 1  
Numbered Standard IPv4 ACL: Example 2  
Numbered Standard IPv4 ACL: Example 3  
Demo - Standard ACL  
Standard ACLs to Control vty Access  
Demo - Access Class  
Testing Packets with Numbered Extended IPv4 ACLs  
Numbered Extended IPv4 ACL Configuration  
Numbered Extended IPv4 ACL: Example 1  
Numbered Extended IPv4 ACL: Example 2  
Demo - Extended ACL  
Named IP ACL Configuration  
Named Standard IPv4 ACL Example  
Named Extended IPv4 ACL Example  
Editing Named IPv4 ACL Example  
Commenting ACL Statements  
ACL Recommended Practices  
Demo - Named ACL  
Monitoring ACL Statements  
Verifying ACLs  
Troubleshooting Common ACL Errors  
Summary  
Chapter 06 Review

## **Chapter 07 - Address Space Management**

1h 17m

### **Scaling the Network with NAT and PAT**

Network Address Translation  
Port Address Translation  
Translating Inside Source Addresses  
Configuring and Verifying Static Translation  
Enabling Static NAT Address Mapping Example  
Dynamic Addresses Translation  
Configuring and Verifying Dynamic Translation  
Dynamic Address Translation Example  
Overloading an Inside Global Address  
Configuring Overloading  
Overloading an Inside Global Address Example  
Clearing the NAT Translation Table  
Demo - NAT  
Translation Not Occurring: Translation Not Installed in the Table  
Displaying Information with show and debug Commands

Translation Occurring: Installed Translation Entry Not Being Used

Sample Problem: Cannot Ping Remote Host

Solution: Corrected Configuration

Summary

## **Transitioning to IPv6**

IPv4 and IPv6

Why Do We Need a Larger Address Space?

IPv6 Advanced Features

IPv6 Address Representation

IPv6 Address Types

IPv6 Unicast Addressing

IPv6 Global Unicast (and Anycast) Addresses

Link-Local Addresses

Larger Address Space Enables Address Aggregation

Assigning IPv6 Global Unicast Addresses

Stateless Autoconfiguration

DHCPv6 (Stateful)

DHCPv6 Operation

Enabling IPv6 on Cisco Routers

IPv6 Address Configuration Example

IPv6 Routing Protocols

RIPng (RFC 2080)

Configuring and Verifying RIPng for IPv6

RIPng for IPv6 Configuration Example

Cisco IOS IPv6 Name Resolution

IPv4-to-IPv6 Transition

Cisco IOS Dual Stack

IPv6 Tunneling

Manually Configured IPv6 Tunnel

Summary

Chapter 07 Review

## **Chapter 08 - LAN Extension into a WAN**

1h 40m

### **Introducing VPN Solutions**

Remote Connection Options

What is VPN?

Site-to-Site VPNs

Remote-Access VPNs

Cisco Easy VPN

Cisco IOS IPsec SSL VPN (WebVPN)

VPN Components

VPN-Enabled Cisco IOS Routers

Cisco ASA Adaptive Security Appliances

VPN Clients

What Is IPsec?

IPsec Security Services

Confidentiality (Encryption)

Encryption Algorithms

DH Key Exchange

Data Integrity

Authentication

IPsec Security Protocols

IPsec Framework

Summary

### **Establishing a Point-to-Point WAN Connection with PPP**

Typical WAN Encapsulation Protocols

An Overview of PPP  
PPP Session Establishment  
PPP Authentication Protocols: PAP  
PPP Authentication Protocols: CHAP  
Configuring PPP and Authentication Overview  
Configuring PPP and Authentication  
PPP and CHAP Configuration Example  
Demo - CHAP  
Verifying the PPP Encapsulation Configuration  
Verifying PPP Authentication  
Verifying PPP Negotiation  
Summary  
**Establishing a WAN Connection with Frame Relay**  
Frame Relay Overview  
Frame Relay Terminology  
Selecting a Frame Relay Topology  
Resolving NBMA Reachability Issues  
Frame Relay Address Mapping  
Frame Relay Signaling  
Stages of Inverse ARP and LMI Operation  
Configuring Basic Frame Relay  
Configuring a Static Frame Relay Map  
Configuring Frame Relay Subinterfaces  
Configuring Frame Relay Point-to-Point Subinterfaces  
Configuring Frame Relay Multipoint Subinterfaces  
Verifying Frame Relay Operation  
Demo - Frame Relay  
Summary  
**Troubleshooting Frame Relay WANs**  
Components of Troubleshooting Frame Relay  
Troubleshooting a Frame Relay Link That Is Down  
Troubleshooting Frame Relay Remote Router Connectivity  
Troubleshooting Frame Relay End-to-End Connectivity  
Summary  
Chapter 08 Review  
Course Closure

**Total Duration: 13hrs 55m**
