Planning and Implementing Windows 2003 Active Directory (70-294)

Level 1

Active Directory Structure   49m 52s

1.1 What is Active Directory
1.2 Logical Structure
1.3 Physical Structures
1.4 Server Roles
1.5 Working Active Directory
Lab - Install Active Directory

Installing Active Directory   1h 10m 54s

2.1 Requirements and Process
2.2 Forest Root Domain
2.3 Child Domain
2.4 Domain Tree
2.5 Replica Domain Controllers
2.6 Renaming Domain Controllers
2.7 Removing Domain Controllers
Lab - Delegation
Lab - Creating a Subnet
Lab - Change Operations Master
Lab - Rename a Domain Controller

Level 2

Active Directory DNS Intergration   23m 49s

1.1 Locating Active Directory Resources
1.2 SRV Records
1.3 AI Intergrated Zones
Lab - Verify SRV Records
Lab - Install a New Domain
Lab - Raise Forest Functionality Level
Lab - Raise Domain Functionality Level
Lab - Configure a Secondary DNS Zone

Trusts   43m 05s

2.1 Functional Levels
2.2 Trusts Types
2.3 Creating Trusts
2.4 Managing Trusts
Lab - Validate Trusts

Organization Units   41m 29s

3.1 Overview of OU's
3.2 Planning of OU's
3.3 Creating OU's
3.4 OU Delegation

Level 3

Active Directory Accounts   48m 24s

1.1 Groups
1.2 User Account Management
1.3 CSVDE
1.4 LDIFDE
1.5 Windows Script Host

Active Directory Management   36m 34s

2.1 User Principal Name
2.2 Moving Objects
2.3 Moving within Domain
2.4 Moving Between Domains
2.5 Auditing AD Access
Lab - Add UPN Name
Lab - Delegate Control

Planning Account Strategy   41m 35s

3.1 Naming
3.2 Password Policy
3.3 Authentication
3.4 Group Strategy
3.5 Auditing
Lab - Configure Password Policy
Lab - User Account Group Scopes
Lab - Auditing Folder Object Access
Lab - Configuring Object Auditing Policy

Level 4

Group Policy Objects   31m 46s

1.1 Purpose
1.2 Controls
1.3 Creating GPO's
Lab - Create GPO
Lab - Create Software Policies

Managing GPOs   43m 16s

2.1 Refresh Interval
2.2 Working with GPO's
2.3 Troubleshooting
2.4 Delegation
2.5 Planning
Lab - Delegate GPO Management
Lab - Move GPO to Another Domain

Software Management   40m 25s

3.1 Windows Installer
3.2 Deploying Applications
3.3 Specialized Deployment
3.4 Deployment Maintenance
Lab - Publish MSI User Software
Lab - Assign MSI Machine Software

Level 5

Sites   40m 32s

1.1 Replication
1.2 Creating Sites
1.3 Site Planning
1.4 Troubleshooting
Lab - Create a New Site
Lab - Create a Replication Partner

Server Roles   34m 41s

2.1 Global Catalog Servers
2.2 Domain Controller Placement
2.3 Operations Master Roles

Maintenance   13m 30s

3.1 Database
3.2 Backup
3.3 Restore
Lab - Backup Active Directory
Lab - Restore Active Directory Authoritive
Lab - Restore Active Directory Non-Authoritive

Total Duration: 9h 20m
