

Adobe Photoshop CS5 Production

- **Course Length:** 1 Day

Course Overview

Photoshop CS5: Production is the third and final title in this series. This course focuses on the specific information needed to create professional-looking images for high-end business printers and commercial print shops. In this course, students will learn project management basics and how to create layer comps. They will also learn how to optimize color management for print. They will explore various techniques for adjusting the quality of an image and making color adjustments. Students will learn how to use CYMK separations for prepress, customize ink options, and adjust CYMK curves. Students will also explore various options for using grayscale, spot-color, and duotones. Finally, they will learn how to optimize images for the Web, balancing quality and file size, and how to prepare images for use in video productions.

Prerequisites/Audience

Students should be familiar with the concepts presented in our Adobe Photoshop CS5 Advanced course prior to taking this course.
